

Design and Technology

Researching, designing, creating and evaluating my own
Roman Shield

Name:

1. What were shields used for? Gather images of Roman shields from online:

2. What kind of materials would it be made from? Why?

3. Create an inventory of words, ideas and phrases that a Roman shield would have to be.

4. Mind map some ideas, drawings and sketches of shapes and patterns that could be on my Roman shield and why I might include them (e.g. does a certain symbol mean something to Romans, i.e. giving good luck during battles?)

5. Thinking about materials a Shield could be made of, list them in column one then tick whether the material could be considered good or bad and an explanation why. CHALLENGE: Give examples of other things made from that material to justify your reasons.

Material	Good or Bad		Explanation

8.

MAKE IT!

9. Take a photograph of your completed Roman Shield and put it here (or draw it)

10. Evaluate

What went well
